

“... *practice environmental holiness with us as we:*

Conserve natural resources and use only renewable resources in every gathering and every ministry of our congregations and Church;

Become partners with other groups already active in defending God’s creation by teaching others, volunteering in projects, and guiding young people and children in the ways that continue this transformation;

Interact with those in power over community, national and international policies to change systems and structures that destroy, deplete or damage the earth.”

From *God’s Renewed Creation: Call to Hope and Action*  
The Council of Bishops of The United Methodist Church, Nov. 4, 2009

### **NC IPL Mission Statement**

North Carolina Interfaith Power & Light works with faith communities to address the causes and consequences of global climate change, and promote practical solutions, through education, outreach, and public policy advocacy.

## North Carolina Interfaith Power & Light *a program of the NC Council of Churches*

*A Religious Response  
to Global Warming*

# Climate legislation?

## Why should I care?

Our senators are debating legislation called the Clean Energy Jobs and American Power Act. The goal is to put a cap on our global warming pollution, provide incentives to accelerate a transition to clean energy, and create new jobs. Smart policy solutions will help ensure a peaceful world for our children.

Governmental, military and scientific experts have concluded that climate change is having significant geopolitical impacts around the world, and is contributing to a host of problems including poverty, environmental degradation, and the weakening of national governments. Their assessments warn that the storms, droughts and food shortages predicted from a warming planet are currently occurring and will worsen in coming decades.

## How is it a **Faith** issue?

All faith traditions have a responsibility to care for God's Creation. We all have a shared responsibility to care for our neighbors and the least among us. Scientists tell us that the poor, elderly and infirm in the U.S., and people in the poorest countries least able to adapt, will be most affected by the climate crisis. While we are already experiencing some of the impacts from climate change, the world our children will face may be unlike anything in human history.

# How can I take **Action**?

The most important thing you can do right now is call U.S. Senators Kay Hagan and Richard Burr and ask them to support strong climate legislation like the Clean Energy Jobs and American Power Act. Senator Burr's office number is 202-224-3154 and Senator Hagan's is 202-224-6342. Ask for the aide who works on energy and climate. Find out your senators' positions on the bill. Let them know you support strong renewable energy and energy efficiency requirements and incentives.

You can also work with North Carolina Interfaith Power & Light (NC IPL) to help your congregation and your household conserve energy and become more energy efficient. This will help you reduce your global warming pollution and save money on your energy bills. Measure and track your house of worship's carbon footprint at [www.coolcongregations.org](http://www.coolcongregations.org). There is also a household calculator on that site - just fill out the brief questionnaire, print out the results, and track the efficacy of energy efficiency improvements that you make over time by entering updated information.

Make use of the educational, worship, and advocacy resources offered on our website, [www.ncipl.org](http://www.ncipl.org). Join us through our online contact form at <http://ncipl.kintera.org/join>. Consider making a difference in your community through volunteering with us to help organize or publicize faith and climate events, such as film showings and discussions, climate justice tours, and congregational energy audit workshops.
