Dear Guest,

This menu is our equivalent of a Broadway dress rehearsal. In our industry they'd call it a soft opening, but it's basically the same thing; a period of time that allows our team to make absolutely certain that our service performance is the best that it can be. And this also extends to our food, itself, and ensuring that all of it is the consistently comforting, truly craveable cuisine that we love to create and serve.

So, if you experience a menu item today that you simply love, or one that you'd say.. "not so much," please let us know! This is your opportunity to help us guarantee that our star flavors and players are center stage for our official Grand Re-Opening in January.

We truly appreciate your patronage, and we sincerely thank you in advance for your feedback.

Bon Appetit!

**The Great Pizza "Name Game" Contest** *Ask your server for entry forms!*

Try as we might, our team was unable to lock down a truly worthy name for our tasty meat trio pizza. It's not quite a meat lovers, but also not quite a deluxe either, living in its very own delicious realm somewhere in between.

So, we've decided to make a contest of it during the month of December, and we are inviting all our valued guests and staff to help us name this pizza. What's at stake? Huge **bragging rights** for the winner, of course, but also lots of **free pizza**. As in, one free pizza per month for a full year! But then, how could we not do that when, you know, it's got your name right on it! :)

**Our Commitment to Quality Ingredients**

We use only all natural, fresh, hormone and steroid free chicken, free from additives or preservatives of any kind. In fact, we use only fresh and pure ingredients across our entire menu—in season and locally sourced whenever feasible. All of our dressings, soups, cornbread, pimento cheese, and more are also housemade, and our handcrafted heritage preparations all endeavor to embody the common flavors of the modern South with our own unique twists... *fresh, fun, flavorful and familiar.* Enjoy!
